Logistics

Where to Conduct the Prayer Summit:
The Prayer Summit is design for the participation of the entire church during all the evening and Sunday morning services. Most likely the auditorium will be the best setting for these times. Depending on the number of people in Saturday morning sessions, it may prove helpful to set up a classroom style setting in the fellowship hall or other appropriate setting.

Items Needed:

- LCD (PowerPoint) projector[s] and screen[s]
- Snacks for Saturday morning children's sessions
- Large tables for books and materials
- Microphone on floor for testimonies

Personnel Needed:

- Nursery workers for all nightly and morning sessions
- Helpers in Children's meetings depending on number of children

Recommended Order of Services:
Since this is a Prayer Summit it might be helpful to abbreviate the Friday and Saturday evening services. The suggested preliminaries could be limited to twenty minutes or less.

- Rousing opening song
- Welcome and prayer
- Congregational songs
- Offering for Christ Life Ministries
- Choir special or other special
- Dismiss children
- Message

Logistics

Suggested Daily Schedule:

Friday

7:00 pm	Church-wide Service/Message

TBD	Optional Prayer Meeting

Sunday

Morning Service

Optional Prayer Meeting (One hour before evening service)

Evening Service (Message/Testimonies)

Financial Policy

We ask the sponsoring church to provide a pro-rated travel expense ($495 for Prayer Summits within a 300 mile radius) in advance. We make no demands, but ask that love offerings be received for our ministry utilizing our envelopes. These envelopes let the people understand what they are giving to. Any checks should be written to the Local Church. One check should be written at the end of the Prayer Summit to Christ Life Ministries. These love offerings go entirely to Christ Life Ministries. Please let me know if this procedure is acceptable.

Set up information for Travel Trailer:

We need a suitable place to park on fifth wheel trailer. All we need is a water hook-up and a 50 amp electric RV plug (see photo below). The electric needs to be within 35 feet from the rear of the trailer.
